

Portfolio Artifact Combination Chessboard

- “Chessboard” to be mounted on cardboard
- Subdivisions of the four main areas to be interchangeable
- Exchange subdivisions several times and have pupils find possible artifacts on the matching crossroad- squares

Objective: Enable students to find artifacts that fit as many different language skills, formats, products and sources as possible thus avoiding papery and sober portfolios and triggering as many facets of abilities with the students as possible without losing the overall main objective: using as much foreign language as possible.
